

University Programs 2014-2015

ProDev Workshop Series

Inspired by the desire to aid students in making good career choices, Qualcomm now partners with student organizations and faculty to offer Professional Development Workshops. Workshop titles include “Excelling In Your New Role” and “Landing Your Dream Job”. They address topics like brand management, owning your career, things you need to know to be successful within the first 90 days of employment, how to identify and evaluate an employer, and how to effectively navigate through the offer management process.

Interested in hosting a workshop? Contact your Campus Recruiter for more details.

Qualcomm Women’s Collegiate Conference (QWCC): Jan 8th-11th

Attend Qualcomm’s annual Women’s Collegiate Conference! During the SPRING ’15 we’ll be hosting freshman and sophomores in Computer Science and Engineering from the top schools across the country. Our goal is to support technical women in an underrepresented workforce by giving female college students a chance to network with experienced industry professionals, as well as, other students in related technical fields. We will also provide you with a platform to grow your technical and professional development skills through the participation in conference tracks and engineering challenges, as well as, explore career opportunities.

Interested in attending? Contact your Campus Recruiter for more information.

Early Identification Program (EIP)

Qualcomm is seeking high-potential freshman in Computer Science, Computer Engineering, or Electrical Engineering to participate in its freshman internship program. Spend 10 weeks during the summer working on challenging real-world projects alongside other EIP students and a team of engineers. You’ll have access to exclusive networking events, mentorship, and more! Some projects might include developing Android embedded apps, developing test cases for modem interfaces, or creating Perl based tools.

Interested in applying? Contact your Campus Recruiter and complete an online profile at www.qualcomm.com/careers.

Diversity Engineering Campus Alignment (DECA): Jan 29th-Feb 1st

Inclusion and diversity are at the heart of innovation. It requires different perspectives to take an idea, perfect it, and turn it into world-changing technology; all of which can only be achieved through a diverse workforce. Qualcomm is seeking students interested in visiting our headquarters in San Diego for an exclusive weekend in SPRING ’15. The weekend includes exciting events such as tours of our campus, engineering challenges, networking opportunities with various affinity groups, and developmental activities. DECA participants have also been exposed to career opportunities such as internships or new grad positions.

Interested in attending? Contact your Campus Recruiter or Diversity Engineering and/or Computer Science Staff.
